## HOLLYWOOD'S

**Sexy comes in all sizes! From A's to double-D's, these stars make the most of their assets**

**F**orget bags and shoes — the must-have accessories in Hollywood are great breasts! And it doesn't matter if they're modest A's or cups that runneth over, as long as stars work what they've got. "Whether she's really small-chested or really big-chested, it's a beautiful part of a woman," says celeb stylist Danna Weiss, who has worked with curvy icon Heidi Klum. "Plus, they're the only things you can really show off without looking trashy!"

### Staying abreast of style

So what are the guidelines for killer cleavage? "A's and B's can pull off anything — even the most plunging necklines," says Weiss. "C's and D's have to be a bit more careful — in general, they shouldn't bare as much skin because they may look too risqué. But a great bustier really works for them." In the end, confidence is what counts. Says Weiss, "Cleavage can have many personalities. It's all in your sense of style."

### Amazing A's

**KATE HUDSON** isn't afraid of taking the plunge with her 32As! "I like not having big breasts," says the 27-year-old. "There's something sexy about it.... There's nothing in my way."

### Beautiful B's

**JENNIFER LOPEZ**, 37, gets as much mileage out of her 34Bs as her famous rump! "[People] think that because I'm shaped this way, I must be scandalous," she says.
